SUMMARY

Data engineer with four years building ingestion and reporting pipelines, most recently owning the nightly platform at a mid-sized analytics company.

EXPERIENCE

Data Engineer

Northwind Analytics | 03/2022 - Present

- Rebuilt the nightly ingestion pipeline so a failed source retries independently, cutting manual reruns from nine a week to none
- Migrated twelve scheduled jobs onto Airflow with explicit dependencies
- Ran the on-call rotation for the data platform

Analytics Intern

Contoso Labs | 06/2021 - 12/2021

- Wrote SQL models for the marketing attribution dashboard
- Helped migrate reporting from spreadsheets to the warehouse

PROJECTS

Churn predictor | 2023

- Trained a gradient-boosted model on two years of subscription data and served it behind a FastAPI endpoint
- Wrote the evaluation harness that compared it against the existing rules

TECHNICAL SKILLS

Languages: Python, SQL, Go

Frameworks: PyTorch, FastAPI

Tools: Airflow, Docker, Git

EDUCATION

BSc Computer Science, Example University, 2017 - 2021
